HOW TO MAKE MONEY WHILE THE SUN SHINES!

Come and join in a conversation about solar PV installations

Eden Mills Community Hall

Friday, March 4 at 7:00pm

a free question and answer get-together

Learn:

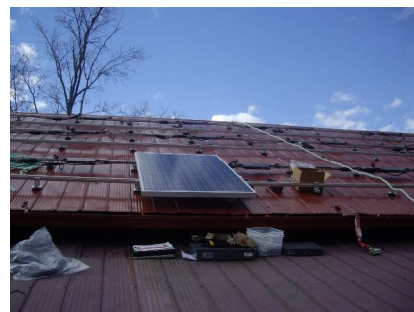

Home of John Liss and Daria Love, Ash Street

- how a solar installation might be the best investment you can make
- how you may be able to improve your home's value while earning income
- how you may be able to install a solar system using other people's money
- how you can reduce your carbon footprint

Hear from neighbours who have already installed solar PV panels:

- What did it cost them to install panels?
- How did they finance the installation?
- The predicted and actual kWh returns to date.

Installation on barn roof of John Cripton and Linda Sword

Meet Thomas Böhni, Swiss engineering expert, with news from a Swiss village investing in sustainable energies

We are exceptionally fortunate that **Thomas Böhni**, a leading engineering expert from Switzerland, is visiting Canada and has offered to meet with us. He will be speaking at a Conference in London, is meeting with Canadian clients and has done some inspiring work in a Swiss village.

Hohentannen solar panel medley!

Mr. Böhni, a mechanical engineer by training, runs Böhni Energy and the Environment. He has worked with Hohentannen, a village of 604 inhabitants which is pushing to a goal of 50% locally-sourced renewable energy by 2012. The focus is on electricity, heat, and vehicle fuels.
